LOCAL BENEFIT

We successfully bridge the gap between industry and local First Nation communities. Choosing NAKODA as your ally is choosing to support First Nations economically, with training, and with employment opportunities. "Let's get to work, Partner!"

MASSIVE FUEL SAVINGS

Our CLEAN heating technologies offer unparalleled efficiencies. PROVEN to offer up to \$2,000/day/unit in savings over traditional heating equipment. "Up to \$60,000 per month... now that's not chump change."

SIMPLIFIED WORK FLOW

Whether it's our technology's disruptive ability to eliminate 75-90% of the heating equipment, fueling only every 2nd day, or eliminating the need for a boiler...things just get simpler!

SAFER SUPERIOR PERFORMANCE

Flameless heat eliminates the #1 source of ignition on industrial work sites... as well as steam burns and is a risk to workers due to non-breathable air. With 20 inch WC (water column) static pressure or more....we can deliver more heat farther than anyone else. "Stick that in your flameless pipe and smoke it!"

DRASTICALLY LOWER EMISSIONS

If you're burning up to 50% less fuel guess what happens to the emissions... exactly, drastically lower! "Honey we just shrunk your carbon footprint!"
